Hello
My name is Lawal Hussein Taiwo

5, Oyebola street
Ikorodu ,Lagos

ABOUT ME

I am an Experienced Frontend Developer with a passion for creating engaging and user-friendly interfaces. With over two years of hands-on experience, I specialize in crafting seamless digital experiences that captivate users. Proficient in HTML, CSS, and Bootstrap,angular js,jquery and javascript . I bring a meticulous approach to design and development, ensuring every detail is thoughtfully considered. My commitment to delivering high-quality web experiences is unwavering, driven by a desire to exceed expectations and create impactful solutions. Whether it's optimizing performance or enhancing accessibility, I approach every project with a strong eye for design and a dedication to excellence.

RESPONSIBILITIES

I develop and maintain frontend features using bootstrap and javascript

I design and implement responsive maintainable CSS3 layouts

I communicate,collaborate and interact well with teams in solving solutions and making decision

I implement best practice for web development, including optimizing performance and usability

I also have knowledge on Git and Git hub to help web development lifecycle flow easily

Skills

- HTML - I have strong foundation in html as the structure of all website created
- CSS - Creating a well designed and responsive website in the desktop and the mobile view

- Bootstrap -I specialize in utilizing Bootstrap's grid system, components, and utilities to ensure seamless experiences across devices.
- Javascript - I specialize in creating dynamic and interactive web experiences. I have experience with various JavaScript libraries and frameworks, including jQuery and angular , to enhance user interfaces and streamline functionality

My projects

1. Hospital Website
-In creating the website i used various languages,they include,html,css,bootstrap.
-Adding animations and transitions for navigating through the web pages
-And has a nice and well understandable views for the interface.with matching colors

2. Personal Portfolio
-In creating my portfolio I used html,css,java script,bootstrap and php for sending emails.
-Providing Animations and transitions in navigating through the web pages
-And added some of my other web application projects including Cloth website,Pepsi landing page, Plant website , Shoe website ,Web calculator ,Web quiz for education purpose

3.TodoList with Indexdb Database
- In creating my todo list i used only html and css.Making it responsive both in desktop view and mobile view
- Adding indexdb as a backend to it.So when the page refreshes the data won't clear and you can continue with adding task to it any day

Education

-**2021-2022:**

I studied at **NIIT** in python programming for 6 months.Where i was able to learn the basic fundamentals in python and build little projects to boost my knowledge in python.

2022 - 2024

*i am currently studying at **Aptech private University**. Studying as a Software engineer in.I basically focused on Software Engineer as a Python developer Where i create well developed projects.Also studying web development with various languages including html,css ,js bootstrap,jquery,angular js.*
I will be attaining ADSE certificate after my 2 years study in Aptech university as software engineer
